

Vamoos - App USER GUIDE

1. DOWNLOAD VAMOOS

Once you have received the links to download the Vamoos App from Google Play Store or App Store:

	https://apps.apple.com/gb/app/vamoos/id887836850
	https://play.google.com/store/apps/details?id=com.appex.vamoos

Choose to Install [1] and Open [2]. (Images used in this document are screenshots from an Android device. Apple's iOS devices will be similar).

By choosing to Allow Vamoos access to device location [3], additional features are possible such as Map directions.

2. LOG IN TO VAMOOS

On the Vamoos home screen you are required to enter your Username and Passcode [4].

IBT will have sent these to you via email.

Once you are logged in, a summary of your tour will be displayed along with a departure timer countdown [5].

Each time you log in to your tour it is advisable to do a 'Refresh' from the drop down menu at the top of your screen [5, 6] – this ensures that any documents which have been updated will be displayed.

3. ACCESS YOUR ITINERARY

Use the "Itinerary" icon at the foot of your screen to access an on-screen version of your daily itinerary [7].

Swipe up / Tap on the day that you wish to view [8] and swipe up to reveal what you have scheduled for that day [9, 10].

4. LOCATE YOUR TOUR DOCUMENTS

Use the "Docs" icon to access your tour documents [11]. These will appear in a list form; simply tap the document that you wish to view [12] – note that you will also find a PDF version of your Itinerary in this section.

In the same way, you can view details relating to your accommodation – such as the hotel details and rooming [13, 14].

5. ACCESS YOUR FLIGHT DETAILS (if applicable)

Use the "Flights" icon at the foot of your screen to access your flight details [15].

Tap on the flight that you wish to view [16] and detailed information for that flight will be displayed [17].

You will automatically receive updates if there are any changes to your flight details.

6. MAPS

Depending on the specifics of your trip, your IBT Tour Coordinator may have added location maps [18] (such as airports or museums) [19]. Tapping on the 'droplet' will display what the location is [20].

Provided that your device has 'location' turned on, by tapping on the small black 'directions' diamond [20], travel directions from your current starting point to the droplet location will be displayed [21].

7. WEATHER

Use the "Weather" icon [22] to access a summary of weather conditions at certain tour locations [23].

Tap on the location that you wish to view [23] and a daily forecast for that location will be displayed [24].
